

## MEMORANDUM

**Date:** August 15, 2005  
**To:** Sam Gennawey  
**From:** Melinda Horne – Applied Earthworks  
**Subject:** Yucaipa Cultural Resources Site Visit

Two historical archaeological sites have been identified:

AE-YUC-1H is located on the South Mesa Water Co. parcel (APN-31811102) and consists of historical structure that may have functioned as a wind-generated pump house. AE-YUC-2H, located on the same parcel, is a formed concrete flood control dam. Both sites will require archival research to ascertain their age, function, and significance.

Two historical residences were also identified: one at 33842 County Line Lane (owner D. Cox); the other at 33808.5 County Line Lane (APN-31821305). Both residences will need to be evaluated by AE's architectural historian.
