

**BACK FILL OF ABANDONED  
SWIMMING POOLS**

Abandonment of a swimming pool requires:

1. A demolition permit, pumping and inspection prior to back filling.
2. Several six inch (6") diameter holes must be broken through the shell in the deepest area of the pool.
3. The pool to be back filled with clean earth, sand gravel or slurry.
4. A compaction report to be submitted to Building and Safety prior to final inspections of the demolition.
5. All electrical equipment shall be disconnected and electrical connections terminated in an approved manner. Electrical conductors supplying underwater light fixtures, re-circulation pumps, air blowers and other equipment shall be removed and terminated in a listed and approved junction box, enclosure or panel board.
