

NAME: Patricia Elbeck

AGE: 49

Healthcare Business Consultant/ Optometric Technical Trainer

As a proven leader in managing large corporate retail, small to mid-size healthcare businesses and my own private ventures, I understand the struggles facing our entrepreneurs, our essential workers and the families that rely on economic growth. I commit to improving quality of life, community and economic development, by accepting nothing less than transparency and accountability.

I pride myself on my critical thinking skills, my record of fiscal responsibility, my ability to accurately manage multiple projects within a budget, and penchant for working with others under a common goal.

As a parent my focus is to promote and encourage both my children on the importance of having set personal goals and encouraging the belief that trade skills are essential skills that can catapult you to success. If elected I will ensure that I will be a voice that advocates for increasing trade and business learning opportunities within our educational outlets.

I believe in maintaining our City's family- oriented charm.

I have enjoyed being involved with community- based non-profits such as:

Lion's Club Friends in Sight, Essilor Vision Foundation, Illumination Foundation, UCI Eyemobile, Special Olympics of Southern California and Remote Area Medical.
