Emergency Activities need to be implemented		YES		NO X

LARVA BREEDING:	NOT OBSERVED	LIGHT	MODERATE	HEAVY
Larva breeding on the ranch	X			
Emergency activities need to be implemented		YES		NO X

RANCH IS IN COMPLIANCE	YES X	NO
------------------------	-------	----

**OBSERVATIONS:**

**From the last inspection-** Dismantling/cage conversion is still in progress, leaving cages stacked outside. Overgrown vegetation still has not been removed, and scrap metal remains. They did however remove the large piles of manure and have gained compliance in this matter.

**At this inspection-** The vegetation in question is being addressed, the ranch manager informed us that the ranch is acquiring a new tractor that the staff will be trained on to address the weeds. There was noticeable feed that was spilled under a silo, and the fly traps need to be replenished. Coop 12 had an accumulation of feathers in the entry.

**RECOMMENDATIONS:**

Remove all excessive vegetation around the ranch. Keep cement entries and in the external areas of the coops clean and free of any accumulation of feathers. Properly dispose of sheet metal that has been discarded around the ranch.

**ACTION TAKEN:**

None

Biosecurity Measures Taken      Yes   X      No
