Larva breeding on the ranch	X			
Emergency activities need to be implemented		YES		NO X

RANCH IS IN COMPLIANCE	YES X	NO
------------------------	-------	----

**OBSERVATIONS:**

**From Last Inspection-** Dismantling/cage conversion project is still on going and significant progress has been made towards converting all coops to a cage free operation. There has also been significant progress towards removing the overgrown vegetation on site, but there is still scrap metal that needs to be removed. All coops where chickens were present had serviceable fly traps that were fully replenished.

**At this inspection-** The overgrown vegetation on site is still being addressed and there has been significant progress towards removing it. The weeds on the field adjacent to coop 12 have been completely removed, but some weeds remain in the areas between the chicken coops and the area behind the packing plant where the John Deere tractor is being stored. The cement entryway in coop 12 continues to have a significant accumulation of feathers and spilled feed.

**RECOMMENDATIONS:**

Continue to remove all excessive vegetation around the ranch. Keep cement entries and in the external areas of the coops clean and free of any accumulation of feathers and waste. Properly dispose of sheet metal that has been discarded around the ranch.

**ACTION TAKEN:**

NONE

Biosecurity Measures Taken      Yes   X      No
