Larva breeding on the ranch	<b>X</b>			
Emergency activities need to be implemented		<b>YES</b>		<b>NO X</b>

<b>RANCH IS IN COMPLIANCE</b>	<b>YES X</b>	<b>NO</b>
-------------------------------	--------------	-----------

**OBSERVATIONS:**

**From Last Inspection-** There has been significant progress in disposing the discarded scrap metal, the only thing that remains from that is some broken down equipment/machinery. There was no visible spilled feed on the compound.

**In this inspection** –The coop entryways look cleaned and free of large accumulation of feathers. Every coop where chickens were present had replenished fly traps and proper ventilation. No leaks or visible bodies of sitting water were observed. Manure continues to be properly abated.

**RECOMMENDATIONS:**

Finish removing the last portion of discarded material (machinery/equipment) from compound. Continue to keep areas outside of the chicken houses as clean as possible from manure and large quantities of accumulation of feathers. Continue to remove the miscellaneous spilled fluids from the coops. Continue, as much as possible, to avoid leaving open sitting water that will attract flies.

**ACTION TAKEN:**

NONE

Biosecurity Measures Taken      Yes   X      No
