**OBSERVATIONS:**

**From Last Inspection-** Weeds on the south side of the property need to be abated.

**In this inspection** – A large pile that consisted of dirt, seed, feathers, and manure was found lying openly on the north side of the ranch behind the chicken houses. A deceased poultry carcass was discovered openly laying between the chicken houses. Additionally broken eggs were seen surrounded by flies on the east side of the property by the chicken houses. A coop had a large quantity of accumulated feathers in the cement entryway. Every coop where chickens were present had replenished fly traps and proper ventilation. No leaks were observed.

**RECOMMENDATIONS:**

Remove the large pile that consists of dirt, seed, feathers, and manure from property. Place deceased poultry and broken eggs in fly-tight containers. Abate overgrown vegetation on property. Keep cement entryways in the coops clean and free of large accumulation of feathers. Continue to keep areas outside of the chicken houses as clean as possible from manure and large quantities of accumulation of feathers. Continue to remove the miscellaneous spilled fluids from the coops. Continue, as much as possible, to avoid leaving open sitting water that will attract flies.

**ACTION TAKEN:**

Sent Administrative Citation for violating manure abatement code. Citation# CE21-2114

Biosecurity Measures Taken      Yes   X      No
