Larva breeding on the ranch	X			
Emergency activities need to be implemented		YES		NO X

RANCH IS IN COMPLIANCE	YES	NO X
-------------------------------	------------	-------------

OBSERVATIONS:

From Last Inspection- The large piles of miscellaneous debris and manure have been removed. Deceased poultry between coop 10 and 11 remains laying openly. Weeds on the south side of the property and between the coops observed. The broken eggs have been removed and cleaned up.

In this inspection – Every coop where chickens were present had replenished fly traps and proper ventilation. No leaks were observed.

RECOMMENDATIONS:

Place deceased poultry in fly-tight containers. Abate overgrown vegetation on property. Keep cement entryways in the coops clean and free of large accumulation of feathers. Continue to keep areas outside of the chicken houses as clean as possible from manure and large quantities of accumulation of feathers. Continue to remove the miscellaneous spilled fluids from the coops. Continue, as much as possible, to avoid leaving open sitting water that will attract flies.

ACTION TAKEN:

NONE

Biosecurity Measures Taken Yes X No
