LARVA BREEDING:	NOT OBSERVED	LIGHT	MODERATE	HEAVY
Larva breeding on the ranch	X			
Emergency activities need to be implemented		YES		NO X

RANCH IS IN COMPLIANCE	YES X	NO
-------------------------------	--------------	-----------

OBSERVATIONS:

The exterior of the ranch still needs to have the overgrown and dead vegetation removed. Bait traps were placed around the ranch and the fly population was extremely low. Water leak in cage #2 which seemed to only be housing 1/3 of the normal capacity of the birds. I was told by the ranch manager that cage #2 would be vacant as the remainder of the birds would be removed by 9/1/20. Cage free structures were in good shape a few broken eggs were present, but the ranch workers were still in the process of their morning pick up of eggs. Lots of building materials still around the ranch for the new cage free coops that are still being worked on.

RECOMMENDATIONS:

Remove overgrown and dead vegetation from the property and remove all manure from coops once chickens are removed.

ACTION TAKEN:

None

Biosecurity Measures Taken Yes X No

Inspected By: Kellie Whitt
