Larva breeding on the ranch	<b>X</b>			
Emergency activities need to be implemented		<b>YES</b>		<b>NO X</b>

<b>RANCH IS IN COMPLIANCE</b>	<b>YES X</b>	<b>NO</b>
-------------------------------	--------------	-----------

**OBSERVATIONS:**

No flies observed upon arrival and once inside of the ranch still no flies. Manure and pesticide logs are current, manure has been removed and there is no piling of manure under the cages. Coop # 2 has a large leak, but I did not see any larva in the affected area. The chickens in coop #2 seemed to have thinned out so it appears they are still removing them.

Workers have placed large fans in the cage free areas due to the high temps, that helps to keep flies away as well as moving air for the birds. The large water puddle observed during my last inspection has been resolved.

The ranch is very messy with building materials, as noted in my last inspection. I'm not requiring a clean up just yet as the conversion of cages is still underway.

Overgrown vegetation around the ranch and maintenance around the public right-of-way area is required.

**RECOMMENDATIONS:**

Immediately repair the leak in coop #2. Abate the overgrown vegetation on the ranch and tidy up the public right-of-way areas around the ranch.

**ACTION TAKEN:**

None

Biosecurity Measures Taken      Yes   X      No
