LARVA BREEDING:	NOT OBSERVED	LIGHT	MODERATE	HEAVY
Larva breeding on the ranch	X			
Emergency activities need to be implemented		YES		NO X

RANCH IS IN COMPLIANCE	YES X	NO
-------------------------------	--------------	-----------

OBSERVATIONS:

No flies were observed while on the exterior of the ranch, inside of the ranch there were minimal flies observed. I viewed approximately 4 dead chickens that needed to be properly disposed of. The ranch had an abundance of feathers around the coops. Several rodent traps observed throughout the coops, all were clear. I observed the small pile of sheet metal remains and should be cleared from the premise. The ranch has an excessive amount of overgrown vegetation along the perimeter.

RECOMMENDATIONS:

Dead chickens must be removed every 72 hours. Remove the excessive feathers, building material and cutback the overgrown vegetation around the perimeter of the ranch in the right of way areas.

ACTION TAKEN:

Biosecurity Measures Taken Yes X No

Inspected By: R Carnell
