**OBSERVATIONS:**

**From Last Inspection-** Weeds on the south side of the property and between the coops remain.

**In this inspection** – Every coop where chickens were present had replenished fly traps and proper ventilation. No leaks were observed.

**RECOMMENDATIONS:**

Abate overgrown vegetation on property. Keep cement entryways in the coops clean and free of large accumulation of feathers. Continue to keep areas outside of the chicken houses as clean as possible from manure and large quantities of accumulation of feathers. Continue to remove the miscellaneous spilled fluids from the coops. Continue, as much as possible, to avoid leaving open sitting water that will attract flies.

**ACTION TAKEN:**

NONE
