Larva breeding on the ranch	X			
Emergency activities need to be implemented		YES		NO X

RANCH IS IN COMPLIANCE	YES X	NO
------------------------	-------	----

**OBSERVATIONS:**

**From Last Inspection-** Weeds on the south side of the property and between the coops remain. The excessive accumulation of feathers in coop 8 have been cleaned up.

**In this inspection** – Another large pile of dirt and debris is present in coop 7. The ground on the cement entryway in coop 10 had dried spilled egg fluids that were attracting flies. Every coop where chickens were present had replenished fly traps and proper ventilation. No leaks were observed.

**RECOMMENDATIONS:**

Abate overgrown vegetation on property. Remove the miscellaneous spilled fluids from the coops. Keep cement entryways in the coops clean and free of large accumulation of feathers. Continue to keep areas outside of the chicken houses as clean as possible from manure and large quantities of accumulation of feathers. Continue, as much as possible, to avoid leaving open sitting water that will attract flies.

**ACTION TAKEN:**

NONE

Biosecurity Measures Taken      Yes   X      No
