Larva breeding on the ranch	X			
Emergency activities need to be implemented		YES		NO X

RANCH IS IN COMPLIANCE	YES X	NO
-------------------------------	--------------	-----------

OBSERVATIONS:

From Last Inspection- Weeds on the south side of the property and between the coops remain. The large pile of dirt and debris in coop 7 has been removed. The dried spilled egg fluids in coop 7 that were attracting flies have been removed.

In this inspection - Every coop where chickens were present had replenished fly traps and proper ventilation. No leaks were observed.

RECOMMENDATIONS:

Abate overgrown vegetation on property. Continue to keep the cement entryways in the coops free of miscellaneous spilled fluids that will attract flies. Keep cement entryways in the coops clean and free of large accumulation of feathers. Continue to keep areas outside of the chicken houses as clean as possible from manure and large quantities of accumulation of feathers. Continue, as much as possible, to avoid leaving open sitting water that will attract flies.

ACTION TAKEN:

NONE

Biosecurity Measures Taken Yes X No

Inspected By: Leander Rodriguez
