-------------------------------	-------	----

OBSERVATIONS:

The fly population was extremely minimal. A small amount of water is puddling at the rear of a vacant chicken coop and causing vegetation to overgrow. Bait stations have been re-activated. The ranch is being maintained and is in good shape.

RECOMMENDATIONS:

Remove the overgrown vegetation and add a couple more fly bait traps at the end of the free range coop.

ACTION TAKEN:

None.

Biosecurity Measures Taken Yes X No
