LARVA BREEDING:	NOT OBSERVED	LIGHT	MODERATE	HEAVY
Larva breeding on the ranch	X			
Emergency activities need to be implemented		YES		NO X

RANCH IS IN COMPLIANCE	YES X	NO
-------------------------------	--------------	-----------

OBSERVATIONS:

No flies observed while suiting up to enter the ranch however, once inside of the ranch there was an area under the conveyor belt where a few eggs had fallen off and had drawn a moderate number of flies to that area. The Ranch is following manure removal guidelines and continues to provide haul slips accordingly. All chickens are maintained indoors and locked. Bait stations are hung around the ranch and maintained.

RECOMMENDATIONS:

Ranch manager will immediately address the area where there was an accumulation of flies from the broken eggs.

ACTION TAKEN:

None

Biosecurity Measures Taken Yes X No
