LARVA BREEDING:	NOT OBSERVED	LIGHT	MODERATE	HEAVY
Larva breeding on the ranch	X			
Emergency activities need to be implemented		YES		NO X

RANCH IS IN COMPLIANCE	YES X	NO
-------------------------------	--------------	-----------

OBSERVATIONS:

No flies observed while suiting up to enter the ranch. The Ranch is following manure removal guidelines and continues to provide haul slips accordingly. All chickens are maintained indoors and locked. Last weeks area of concern (flies around broken eggs) had been cleaned up and no flies present. The ranch had a large excavator with arm removing the cages from one of the coops in preparation for the cage free conversion, so there was a large area of broken metal cages in a huge pile that will need to be disposed of. Fly bait strips and stations are maintained around the property.

RECOMMENDATIONS:

No recommendations, however, the ranch manager did explain the process in which the conversion will happen, and they are scheduling in multiple large trash bins to start disposing of the broken cages and remove them from the property.

ACTION TAKEN:

None

Biosecurity Measures Taken Yes X No
