Larva breeding on the ranch		X		
Emergency activities need to be implemented		YES	NO	X

RANCH IS IN COMPLIANCE	YES	X	NO
-------------------------------	-----	---	----

OBSERVATIONS:

Fly population still more than normal but Fania fly is not evident. On all houses numerous flies were observed on the uprights and on the roofs that were in the sun, and all fly traps were full. On the ground below house 3 and several other spots were inspected and numerous larvae were observed. Manure will be picked up this evening and disposed of and all areas will be sprayed and fly traps will be rejuvenated. Remainder of coops need to have dirt placed over manure still. Owner sprayed twice and fly traps were refreshed this week (Tuesday and Thursday) and will spray again on Saturday. There were quite a few small and large leaks that will be abated immediately (no larvae noted in soil below leaks).

RECOMMENDATIONS:

Continue to add fresh dirt below remaining coops and mow vegetation to no higher than 4 inches **before** inspection scheduled for **Tuesday, October 24, 2017**. Remove chicken manure per the Manure Management Plan requirements. Continue with the spraying 2-3 times a week.

ACTION TAKEN:

Next inspection scheduled for Tuesday, October 24, 2017.

Biosecurity Measures Taken Yes x No
