Larva breeding on the ranch	X			
Emergency activities need to be implemented	YES		NO	X

RANCH IS IN COMPLIANCE	YES	X	NO
-------------------------------	-----	---	----

OBSERVATIONS:

Minimal fania flies noted (warm day). Many sites (under coops and large pile) were inspected for evidence of larvae but none were observed. Large pile will be removed tomorrow. Due to rains the ground is not level but will be leveled off to avoid water collection (checked area for larvae and found none present). Fly traps were rejuvenated Wednesday of last week as noted in the logs. There were very few leaks noted in a couple of the coops that will be remedied today.

RECOMMENDATIONS:

Maintain manure management plan and scrape up all manure in collection area. Repair leaks in the coops.

ACTION TAKEN:

Re-inspection will be Tuesday, April 3, 2018. Will be looking specifically to make sure that manure in collection area has been completely removed now that we have drier weather.

Biosecurity Measures Taken Yes x No

Inspected By: P.Swantek
