**OBSERVATIONS:**

No flies observed at all. Many sites (under coops and large pile) were inspected for evidence of larvae but none were discovered. Large pile will be removed tonight/tomorrow morning. Ground has been leveled where manure is stored before pickup. Fly traps were rejuvenated Tuesday of last week as noted in the log. There were very few leaks noted in a couple of the coops that will be remedied today. Broken eggs need to be abated in the free-range chicken area.

**RECOMMENDATIONS:**

Maintain manure management plan and scrape up all manure in collection area. Repair leaks in the coops. Abate all broken eggs in free-range chicken area.

**ACTION TAKEN:**

Re-inspection will be Friday, April 13, 2018.
