Larva breeding on the ranch	X			
Emergency activities need to be implemented		YES	NO	X

RANCH IS IN COMPLIANCE	YES X	NO
-------------------------------	--------------	-----------

OBSERVATIONS:

Only flies noted were in the fly traps on the east side...no fania flies at all. Many sites (under coops and large pile) were inspected for evidence of larvae but none were discovered. Large pile will be removed tonight/tomorrow morning. Fly traps were rejuvenated Tuesday of last week as noted in the log and all of them looked good. There were very few leaks noted in a couple of the coops that will be remedied today but were not extreme and resulted from clogged up watering cups. Just a few broken eggs need to be abated between coops. Ranch was very clean.

RECOMMENDATIONS:

Maintain manure management plan and scrape up all manure in collection area. Repair leaks in the coops. Remove the few broken eggs in between the chicken coops.

ACTION TAKEN:

Re-inspection will be Friday, April 25, 2018.

Biosecurity Measures Taken Yes x No

Inspected By: P.Swantek
