Larva breeding on the ranch		X		
Emergency activities need to be implemented		YES	NO	X

RANCH IS IN COMPLIANCE	YES	X	NO
-------------------------------	-----	---	----

OBSERVATIONS:

Fania flies were less than last time. Many sites (under coops) were inspected for evidence of larvae.

In coop #4 (with the dirt floor), compacted manure was inspected in a couple of the damp sections and only in one small area was larvae observed. All coops were treated with insecticide (spray) on Monday, October 1st, Thursday, October 4th, 2018, and Friday, October 5th, 2018 (Triazicide) of last week. Fly traps were rejuvenated on Tuesday, October 2nd, 2018.

Spilled feed is in excess in between the coops.

There were few leaks in the cups and no leaks in any of the water lines as observed during the last inspection.

Feathers and broken eggs were abated between the coops and in free range area as requested.

RECOMMENDATIONS:

- Maintain removal of chicken manure per the Manure Management Plan requirements (logs sent to City every Monday).
- Repair all leaks in the water cups.
- Clean up excessive spilled feed under and around all of the coops before next inspection.

ACTION TAKEN:

Next on-site inspection scheduled for **Tuesday, October 16, 2018.**

Biosecurity Measures Taken Yes x No

Inspected By: P.Swantek
