Larva breeding on the ranch		X		
Emergency activities need to be implemented		YES	NO	X

RANCH IS IN COMPLIANCE	YES X	NO
-------------------------------	-------	----

OBSERVATIONS:

Fania flies not observed. Many sites (under all coops) were inspected for evidence of larvae.

In coop #4 (with the dirt floor), compacted manure was inspected in a couple of the damp sections and only in one small area was larvae observed. All coops were treated with insecticide (spray) on Monday, October 8th, Thursday, October 11th, 2018, and Friday, October 12th, 2018 (Triazicide) of last week. Fly traps were rejuvenated on Tuesday, October 16th, 2018.

Spilled feed is still in excess in between the coops but looks better.

There were several leaks in the cups and only one leak in a main water line which had been repaired that morning.

RECOMMENDATIONS:

- Maintain removal of chicken manure per the Manure Management Plan requirements (logs sent to City every Monday).
- Repair all leaks in the water cups.
- Continue to clean up excessive spilled feed under and around all of the coops before next inspection (scrape all the way down on the concrete).

ACTION TAKEN:

Next on-site inspection scheduled for **Tuesday, October 23, 2018.**

Biosecurity Measures Taken Yes x No

Inspected By: P.Swantek
