

## **COVID-19 Information**

March 12, 2020

The City of Yucaipa continues to monitor the ever-evolving situation involving the worldwide COVID-19 disease outbreak.

What is the City doing about the COVID-19?

First and foremost, the City is following the guidance and lead of the County Department of Public Health and the Center for Disease Control (CDC).

The City is currently working on a COVID-19 Response Plan that will include four (4) phases. Currently we are in Phase 1 which means we are taking precautions in your community facilities, monitoring the situation and planning in case we see cases in our County or community. However, we have just received notice from the County Board of Supervisors, Chairman Curt Hagman, that the County's Public Health Officer "has ordered the immediate cancellation or postponement of gatherings of more than 250 people within the County until further notice (see attached)." **Postponements will include the City's Eggstraveganza, the Rodeo, the YMAF, the March CERT Basic Training Course, the Emergency Preparedness Expo, the State of the City for now.** This is a fluid event and can change day to day.

If we move to Phase 2, this means that there are confirmed cases of COVID-19 in SB County or our community. We will continue to monitor the situation and are planning for additional cases in our community.

Phase 3 happens if there are confirmed community spread in Yucaipa or a contiguous City. At this stage the City could cancel and/or reschedule smaller events and activities or even close facilities.

Phase 4 is characterized by the reduction in active cases of the disease progression. Efforts to reduce, contain and mitigate may be reduced.

Do you think that the facility (Library, Community Center, Scherer Community Center) will close down?

The City is currently working on COVID-19 Response Plan that includes three phases. Currently we are in Phase 1, which means we are taking precautions, monitoring the situation and planning in case we see cases in our County or community. This is a fluid event and can change day to day. The City has a plan in place should the situation change and that plan could result in facility closures if appropriate.

What programs might be cancelled?

Per the guidelines in the City of Yucaipa COVID-19 response plan and the California Department of Public Health guidance on mass gatherings – we would consider canceling or rescheduling additional programs and activities with more than 100 people in Phase 2. We could also cancel or reschedule all programs at the Scherer Community Center based on the vulnerability of the population.

### County orders cancellation of large gatherings

Board of Supervisors Chairman Curt Hagman has announced that, in an effort to protect the public from any possible spread of the virus that causes COVID-19, the County's Public Health Officer today has ordered the immediate cancellation or postponement of gatherings of more than 250 people within the county until further notice.

The order applies to, but is not limited to, concerts, conferences, and professional, college, and school sporting events, and is in line with guidance issued late Wednesday night by the California Department of Public Health.

"The County realizes that this order will result in inconveniences to many people and businesses. However, the County's primary concern is the health and wellbeing of its residents and visitors," Hagman said.

Smaller gatherings should refer to guidance from the California Department of Public Health, which can be found [here](#).

The County Public Health Officer's order does not apply to activities such as attendance at regular school classes, work, or essential services.

"Certain activities are essential to the functioning of our state and must continue," the order states. "Hence, this Order does not apply to essential public transportation, airport travel, or shopping at a store or mall. This Order also does not apply to congregate living situations, including dormitories and homeless encampments."

Although there are no confirmed cases of COVID-19 within the county, numerous cases have been confirmed in neighboring counties. Large gatherings that attract travelers and other people who don't routinely congregate with each other increase the risk of COVID-19 appearing within San Bernardino County.

As should always be the case, people experiencing symptoms of contagious illness should seek medical guidance, not attend work or school, and avoid contact with other people.

On Tuesday, the County Public Health Officer and the Board of Supervisors declared a local health emergency to help ensure county government and the public are prepared for the possibility that COVID-19 will appear within the county.

Various appropriate County departments and agencies have been working together since Jan. 25 to prepare for the possible arrival of the virus within the county. That is when the County was notified an aircraft carrying U.S. citizens evacuated from the region in China where the virus had originated might be arriving at Ontario International Airport. The flight was eventually diverted to Riverside County. The County Department of Public Health activated its Department Operations Center on Feb. 13.

County Public Health continues to work with the Centers for Disease Control and Prevention (CDC) and the California Department of Public Health to respond to reports of COVID-19. Although Governor Newsom declared a State of Emergency to help the state prepare for broader spread of COVID-19, the health risk from COVID-19 to the general public in San Bernardino County remains low at this time.

As with any virus, especially during the cold and flu season, there are a number of steps you can take to protect your health and those around you:

- Avoid close contact with people who are sick.
- Wash hands with soap and warm water for 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol.
- Avoid touching eyes, nose or mouth, especially with unwashed hands.
- Clean and disinfect frequently touched objects and surfaces using regular household cleaning spray or wipes.
- If someone does become sick with respiratory symptoms like fever and cough, they should stay away from work, school or other people to avoid spreading illness and seek assistance from their healthcare provider if symptoms become severe.
- N95 masks are not recommended outside a healthcare setting. Surgical masks can be worn by sick individuals to reduce the likelihood of spreading germs to others.

For more information on COVID-19, please call (800) 722-4794 or visit the County Public Health COVID-19 webpage at [wp.sbcounty.gov/dph/coronavirus](http://wp.sbcounty.gov/dph/coronavirus). Information is updated as soon as it is made available.

Event organizers seeking guidance from the Public Health Officer specific to their planned events should send their inquiries to [coronavirus@dph.sbcounty.gov](mailto:coronavirus@dph.sbcounty.gov).
