Coronavirus Confirmed in the City of Yucaipa

Today we learned that 12 individuals in one nursing facility here in Yucaipa have tested positive for COVID-19 and a resident of a second nursing facility in Mentone may have contracted the virus as well. County Public Health professionals are working closely with both facilities in the testing of all facility residents and employees. Unfortunately, it was confirmed that an 89-year-old woman at the nursing facility became the first known casualty of COVID-19 here in Yucaipa.

We will continue to update the community as information becomes available. Please, please follow the social distancing requirements, shelter at home as much as possible and continue to support each other through this horrible pandemic.

Mayor David Avila
